PROFESSIONAL SUMMARY

Strategic data leader with over two decades of experience scaling complex platforms and driving data-driven transformation. Proven ability to bridge business objectives with technical execution by leading cross-functional teams. A continuous learner modernizing legacy data ecosystems with advanced machine learning, cloud computing, and agentic AI.

TECHNICAL EXPERTISE

Modern Data Stack: Google Cloud Platform, AWS, Snowflake, dbt, Alteryx

AI & Machine Learning: Vertex AI, Amazon SageMaker Large Language Models (LLMs), Machine Learning, MLOps, LangChain, Agentic AI, Deep Learning, Data Science

BI & Visualization: Tableau (Certified), Power BI, SAP Business Objects

Databases: Oracle (Certified Professional), Postgres, SQL Server, Sybase, NoSQL, ChromaDB, Redis, Star/Snowflake Design

Languages: SQL, PL/SQL, Python, TypeScript, Node.js, Java (Sun Certified)

Tools & Platforms: Google Cloud Build, Docker, CI/CD Pipelines, FastAPI, React, Informatica, Datameer, DBeaver, Toad, GitHub, Jira, Google Workspace, Microsoft 365

PROFESSIONAL EXPERIENCE

Applied AI (Independent study and product builds) (June 2025 – present)

Independent study and product builds

- Upskilled in machine learning and agentic AI: large language models, retrieval, tool-using agents, and deployment.
- Built a real-estate enterprise RAG agent over Mecklenburg County tax and sales records with Python, LangGraph, Chroma, and Streamlit. The agent chooses SQL or document retrieval. Implemented a centralized Redis caching layer, **optimizing repeat-query performance by 99.3% average latency** reduction (p95 drop from 8.00s to 43ms) and eliminating redundant cloud API calls.
- Built CivicPocket, a public-assistance finder for Mecklenburg County, with Next.js, FastAPI, Vertex AI, and BigQuery. Common personal details are stripped before a question reaches the model.
- Built Peaceful Places, a Charlotte directory of calm places and community events, with Next.js, Express, and Gemini on Cloud Run.
- Built Rootloop, an on-device household habit tracker with React Native, Expo, and SQLite. The browser version keeps data on the device, with no cloud account.

THOMSON REUTERS, Eagan, MN

Lead Software Engineer (January 2012 – May 2025)

FindLaw - Performance Analytics Group (2015 – May 2025)

Findlaw was acquired by Internet Brands in Dec 2024

- **Integrated AI-powered analytics** to enhance data reporting capabilities and provide predictive insights
- **Reduced dashboard development time by 65%** by implementing dbt (Data Build Tool) from scratch, establishing modular data transformation workflows used by a team of 8 analysts
- **Created Budget Estimator tool that uses** machine learning models to categorize Google Ads into correct practice areas
- **Eliminated 15+ hours of weekly manual reporting** by designing PPC Budget and Performance Dashboards that resolved complex budgeting issues; received company-wide **"Star Performer" award**
- Architected social media budget reporting solution for Facebook products and article forecast reporting system for workload balancing

- **Decreased data inconsistencies by 35%** by creating standardized, certified Tableau data sources used by 20+ analysts company-wide
- **Lead technology transition** following Internet Brands' acquisition of FindLaw from Thomson Reuters by enabling seamless customer data porting and updating 15+ downstream processes to ensure smooth operations after SAP account numbering system restructuring
- **Maintained operational continuity** during transition with minimal service disruptions to customers. Revised Reporting frameworks to align with Internet Brands' business requirements and KPIs

FindLaw - Data Services Group (2012 - 2015)

- **Headed the BPM fulfillment analytics team and increased offshore team productivity by 28%** through structured weekly leadership meetings and clear implementation guidance. Led the offshore team by leading weekly status meetings and guiding them with the proper implementation. Provided weekly status updates to business and stakeholders regarding the work performed by the team.
- Performed the data modeling, data mapping, and analysis for several key reporting projects such as Oracle BPM reporting, Vender API (crowdsourcing of content), Call Quality, Scheduling of Calls, Product Performance etc.
- Integrated FindLaw's customer data with Thomson Reuters Master Data Management System
- **Reduced query execution time** through SQL optimization and data model improvements
- **Led** technical book discussions on advanced analytics. Created training materials for the business and developers.
- Implemented several Business Objects Universes and developed BO reports

ECOLOGIC ANALYTICS, Bloomington, MN

Senior Analyst / Oracle Software Engineer (*January 2007 - January 2012*)

- **Enhanced data security protocols for utility customers** by designing and implementing comprehensive security architecture including Oracle VPD implementation
- **Accelerated data processing by 70%** by rewriting core processes with table partitioning and resolving production locking issues
- Successfully configured MDMS (Meter Data Management System) for major utility companies and supported RFP responses. **Implemented MDMS** through on-site client visits and requirements gathering at Pacific Gas And Electric, Austin Energy, and Indianapolis Power and Light. **Automated 90% of data migration processes** by developing robust ETL frameworks for the Ecologic MDMS platform

WOLTERS KLUWER FINANCIAL SERVICES, Minneapolis, MN

Database Administrator (*January 2004 - January 2007*)

- IRAMC Database management. Build deployments. Optimizing SQL Queries. Migration

INFRAISOFT TECHNOLOGIES, Mumbai, India

Software Programmer (*August 2001 - November 2003*)

- **Reports** for Coutts Bank. Web frameworks. CMM Level 5 certification. Built database components.

CERTIFICATIONS

- Tableau Certified Developer
- Oracle Database Administrator Certified Professional
- Sun Certified Java Programmer

EDUCATION

Bachelor of Science in Computer Science, Mumbai University, India - *Graduated 2001*
