PROFESSIONAL SUMMARY

Strategic data leader with over two decades of experience scaling complex platforms and driving data-driven transformation. Proven expertise in cloud data engineering, Snowflake, dbt, ETL/ELT, business intelligence, and data architecture, alongside hands-on experience developing machine learning, RAG, and agentic AI solutions across AWS and Google Cloud. Forward-thinking and committed to continuous learning; focused on leveraging cloud technologies, advanced analytics, machine learning, and agentic AI to accelerate innovation and create measurable business value.

TECHNICAL EXPERTISE

Modern Data Stack: AWS (S3, Athena, Glue, Kinesis, Firehose, SageMaker, Bedrock), Google Cloud Platform (Vertex AI, BigQuery, Google Cloud Build), DuckDB, Parquet, Snowflake, dbt, Alteryx
AI & Machine Learning: Large Language Models (LLMs), Machine Learning, MLOps, LangChain, Agentic AI, Deep Learning, Data Science
BI & Visualization: Tableau (Certified), Power BI, SAP Business Objects
Databases: Oracle (Certified Professional), Postgres, SQL Server, Sybase, NoSQL, ChromaDB, Redis, Star/Snowflake Design
Languages: SQL, PL/SQL, Python, TypeScript,Java (Sun Certified)
Tools & Platforms: Streamlit, Docker, Apache Airflow, CI/CD Pipelines, FastAPI, React, Informatica, Datameer, DBeaver, Toad, GitHub, Jira, Google Workspace, Node.js, ReAct, Microsoft 365

PROFESSIONAL EXPERIENCE

Applied AI and Machine Learning (Independent) (June 2025 – present)

- Built a youth mental health risk model on the 2024 National Survey of Children's Health with XGBoost, SHAP, and MLflow. The explainer runs on Streamlit.
- Built FinanceBuddy, a personal-finance lakehouse with synthetic ledgers, dbt on Athena, ML for subscriptions/habits/fraud, and a Streamlit UI on S3 gold. Optional Kinesis streaming and a Bedrock Haiku coach grounded in marts.
- Built a real-estate enterprise RAG agent over Mecklenburg County tax and sales records with Python, LangGraph, Chroma, and Streamlit. The agent chooses SQL or document retrieval. Implemented a centralized Redis caching layer, **optimizing repeat-query performance by 99.3% average latency** reduction (p95 drop from 8.00s to 43ms) and eliminating redundant cloud API calls.
- Built CivicPocket, a public-assistance finder for Mecklenburg County, with Next.js, FastAPI, Vertex AI, and BigQuery. Common personal details are stripped before a question reaches the model.

THOMSON REUTERS, Eagan, MN

Lead Software Engineer *(January 2012 – May 2025)*

FindLaw - Performance Analytics Group (2015 – May 2025)
Internet Brands acquired FindLaw in Dec 2024

- **Championed and implemented dbt from scratch** to eliminate redundant, fragmented SQL across 8 analysts, centralizing transformation logic, establishing Git version control, and **reducing dashboard development time.**
- **Led cloud data warehouse modernization to Snowflake**, designing scalable **ELT pipelines** to ingest input datasets staged in **AWS S3** and orchestrating schedule-driven **dbt model runs using Apache Airflow DAGs**.
- **Integrated AI-powered analytics** to enhance data reporting capabilities and provide predictive insights

- **Created Budget Estimator tool that uses** machine learning models to categorize Google Ads into correct practice areas
- **Eliminated 15+ hours of weekly manual reporting** by designing PPC Budget and Performance Dashboards that resolved complex budgeting issues; received company-wide **"Star Performer" award**
- Architected social media budget reporting solution for Facebook products and article forecast reporting system for workload balancing
- **Decreased data inconsistencies by 35%** by creating standardized, certified Tableau data sources used by 20+ analysts company-wide
- **Led technology transition** following Internet Brands' acquisition of FindLaw from Thomson Reuters by enabling seamless customer data porting and updating 15+ downstream processes to ensure smooth operations after SAP account numbering system restructuring
- **Prototyped AWS MLOps workflows in internal hackathons**, leveraging **AWS (SageMaker)** for model deployment pipelines

FindLaw - Data Services Group (2012 - 2015)

- **Headed the BPM fulfillment analytics team and increased offshore team productivity by 28%** through structured weekly leadership meetings and clear implementation guidance.
- Performed the data modeling, data mapping, and analysis for several key reporting projects such as Oracle BPM reporting, Vender API (crowdsourcing of content), Call Quality, Scheduling of Calls, Product Performance etc.
- **I**ntegrated FindLaw's customer data with Thomson Reuters Master Data Management System
- **Reduced query execution time** through SQL optimization and data model improvements
- **Led** technical book discussions on advanced analytics. Created training materials for the business and developers.
- Implemented several Business Objects Universes and developed BO reports

ECOLOGIC ANALYTICS, Bloomington, MN

Senior Analyst / Oracle Software Engineer *(January 2007 - January 2012)*

- **Enhanced data security protocols for utility customers** by designing and implementing comprehensive security architecture including Oracle VPD implementation
- **Accelerated data processing by 70%** by rewriting core processes with table partitioning and resolving production locking issues
- **S**uccessfully configured MDMS (Meter Data Management System) for major utility companies and supported RFP responses. **Implemented MDMS** through on-site client visits and requirements gathering at Pacific Gas and Electric, Austin Energy, and Indianapolis Power and Light. **Automated 90% of data migration processes** by developing robust ETL frameworks for the Ecologic MDMS platform

WOLTERS KLUWER FINANCIAL SERVICES, Minneapolis, MN

Database Administrator *(January 2004 - January 2007)*

- IRAMC Database management. Build deployments. Optimizing SQL Queries. Migration

INFRASOFT TECHNOLOGIES, Mumbai, India

Software Programmer *(August 2001 - November 2003)*

- **Reports** for Coutts Bank. Web frameworks. CMM Level 5 certification. Built database components.

CERTIFICATIONS

- Tableau Certified Developer
- Oracle Database Administrator Certified Professional
- Sun Certified Java Programmer

EDUCATION

Bachelor of Science in Computer Science, Mumbai University, India - *Graduated 2001*
